

UNYVERO URINARY TRACT INFECTION (UTI) PANEL

PCR Analyte Panel Covers 88 Pathogens & 15 antibiotic resistance genes in complicated urinary tract infections.

88

Pathogens

15

Resistance Markers

Gram-positive Bacteria

Coagulase-negative staphylococci
Staphylococcus aureus
Staphylococcus saprophyticus
Streptococcus agalactiae
Enterococcus spp.
Enterococcus faecalis
Enterococcus faecium
Corynebacterium urealyticum

Non-fermenting Bacteria

Acinetobacter baumannii complex
Pseudomonas aeruginosa

Anaerobes

Bacteroides spp. /
Prevotella spp.

Enterobacteriaceae

Enterobacteriaceae
Citrobacter freundii / *koseri*
Enterobacter aerogenes
Enterobacter cloacae complex
Escherichia coli
Klebsiella oxytoca
Klebsiella pneumoniae
Klebsiella variicola
Proteus spp.
Providencia spp.

Fungi

Candida spp.
Candida albicans
Candida auris
Candida glabrata

Resistance to Gene

Oxacillin mecA

Glycopeptides vanA
vanB

3rd gen. Cephalosporins ctx-M

Carbapenems imp
kpc
ndm
oxa-23
oxa-24/40
oxa-48
vim

Polypeptides / polymyxins mcr-1

Fluoroquinolones qnrB
qnrS

Sulfonamides sul1

SAMPLE TYPES

- Urine (mid-stream / suprapubic / fresh catheter)
- Tissue

CHOOSE UNYVERO UTI

- Enables improved patient management and promotes good antibiotics stewardship
- MOH-licensed clinical laboratory

TEST RESULTS

- PDF via email; other channels available
